## EXPERIENCE

### Backend Software Engineer

Feb. 2026 – Present

*Grip Shipping, Inc., fulfillment software for perishable-goods brands*

*Remote from Colombia*

- Built the bulk upload that lets clients create advance shipment notices (ASNs) from Excel or CSV, which before only Grip's internal team could do. Later added warehouse transfers and bulk edits.
- Building one backend check for ASN rules, shared by the portal form, the bulk upload and the admin tool. Bad requests get a 400 with the reason and save nothing.
- Found that a stored procedure ignored the customer when closing transfer orders. Since PO numbers repeat across customers, 55 of 269 open transfers were stuck. Fixed it in production.
- Fixed a bug, present since September 2025, that wiped a bundle's component SKUs whenever it was edited.
- Restored tracking on 260 of 262 orders whose labels had been voided by mistake, using transactional SQL.
- Diagnosed why a client's Shopify products came in as unknown SKUs: the app lacked the `read_products` permission, so the lookup failed without an error.
- Review PRs and bugs with Claude Code agents, using a second set of agents to try to disprove the first set's findings before checking them against the code.
- Keep a ticket log that the agents write and update (26 entries, each fact marked as confirmed or still to verify) and run scheduled jobs that summarize new tickets every morning and scan error logs for failures.

### Programming Assistant

Feb. 2024 – Dec. 2024

*University of North Florida*

*Jacksonville, FL*

- Helped students in a lab used by 900+ people per semester with machines, software setup and accounts, and wrote up fixes for recurring issues.

### Data Analysis Intern

Aug. 2022 – Jan. 2023

*SalesLand Colombia SAS*

*Bogotá, Colombia*

- Cleaned and validated recruitment and performance data in Python and Excel, and wrote scripts to automate recurring reports.

## EDUCATION

### University of North Florida

Jacksonville, FL

*Bachelor of Science in Computer Science*

*Jan. 2021 – Dec. 2025*

- GPA 3.66/4.0. Honors: President's List, Dean's List, Latin American/Caribbean Scholarship, Upsilon Pi Epsilon.

## PROJECTS

### AI JobShield | *Python, scikit-learn, Streamlit*

- Classifier that flags fraudulent job postings, trained on 17,000+ labeled listings, with a Streamlit demo.

### PRism | *Python, FastAPI, PostgreSQL, Lit*

- Prototype that turns spreadsheet media-coverage reports into dashboards and presentation exports.

## TECHNICAL SKILLS

**Languages:** Python, SQL (T-SQL), JavaScript

**Backend & web:** FastAPI, REST APIs, GraphQL (Shopify API), Lit, Jinja2, Django

**Data & cloud:** SQL Server, PostgreSQL, Redis, Databricks, Azure (App Service, Functions), GitHub Actions

**AI & testing:** Claude Code agents, MCP, scikit-learn, pandas, pytest, Vitest

**Spoken:** Spanish (native), English (professional, B.S. completed in English), Portuguese (B1)
